PRESS RELEASE

Sub: DVC is committed to consumers at this hour of crisis

In the last 48 hours, there has been unprecedented rainfall and inclement weather in several districts where DVC power stations and substations are located across the States of West Bengal & Jharkhand. As a result, normal operations in the power stations have been severely affected. The situation has been further aggravated due to constraints in coal supply and transportation.

In order to maintain continued generation and power supply to the consumers, all resources have been mobilized and all out efforts are being made to normalize power supply at the earliest.

We request our esteemed consumers to bear with us at this hour of crisis. DVC reiterates its commitment to supply uninterrupted power to its consumers and provide the best services at all times.

1st October 2021
